Christopher Delgado

Senior Data Analyst

East Meadow, NY · (516) 426-1936 · chrisdelgado.mail@gmail.com · linkedin.com/in/christopherdelgadospage

SUMMARY

Senior Data Analyst with 6 years of experience translating business questions into clear, decision-ready reporting for executive, sales, purchasing, and operations teams. Technical foundation in SQL, Google BigQuery, data modeling, and Power BI, built across real supply-chain environments. Deep domain expertise in specialty-food distribution and import/export operations — SKU-level analysis, gross profit, purchasing, and inventory — and the business context to know what the numbers actually mean. Built a company's first data function from scratch and serves as its technical lead.

TECHNICAL SKILLS

Programming & Tools: Advanced SQL, PostgreSQL, Python, Git, AI-assisted workflows
BI & Visualization: Power BI, Looker Studio, Excel (advanced), Streamlit
Data Engineering: Data modeling, ETL, data validation, KPI development
Domain: Specialty-food distribution, import/export & supply-chain analytics, inventory & gross-profit reporting

PROFESSIONAL EXPERIENCE

Musco Food Corp.
2022 – Present
Data Analyst
Maspeth, NY

- Built Musco Food's data team from the ground up — growing a one-person IT role into a 3-person data team and leading its technical design and direction to deliver the company's first repeatable reporting infrastructure across sales, purchasing, and operations.
- Led end-to-end migration from legacy ERP to PostgreSQL — modeling 8 financial and transactional tables and validating 4M+ records to deliver 100% data integrity for audit-ready reporting.
- Designed and maintained 4 recurring executive dashboards in Power BI, built on data pipelines from Google BigQuery, giving leadership, sales, and purchasing self-serve visibility into revenue, gross profit, and inventory across ~1,600 SKUs.
- Advised the imports team on overseas vendor payment timing by modeling Forex trends, saving ~$30K annually in currency-conversion costs.
- Trained 3 employees across sales, marketing, HR, and operations on self-serve reporting tools, increasing adoption of data-driven workflows and cutting ad-hoc report requests by 20%.

Outlier.ai
2024 – Present
Freelance AI Trainer (Mathematics)

- Evaluated and ranked LLM-generated solutions to advanced math, statistics, and economics problems, scoring factual accuracy to improve model performance.
- Designed complex, domain-specific problem sets and written explanations to train and benchmark next-generation models.

Green Art Plumbing
2020 – 2021
Data / E-Commerce Specialist

- Managed data integrity across 3 eCommerce platforms, syncing inventory and catalog data to keep listings accurate for 50,000 SKUs.
- Built repeatable Excel workflows to clean and transform vendor data for bulk catalog uploads and ongoing maintenance.
- Defined new sales KPIs with the sales team, contributing to ~8% YoY sales-growth-margin improvement.
- Partnered with customer service to correct a recurring sales-inquiry error, lifting positive feedback ratings by 4%.

EDUCATION

SUNY Cortland — Cortland, NY
Bachelor of Science in Mathematics, Minor in Computer Applications

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
